(54) Title: PROCESS FOR MANUFACTURING LABELS AND AN ARRANGEMENT FOR IMPLEMENTATION OF SAID PROCESS

(57) Abstract: The present invention relates to a process for the manufacturing of labels made of textile material and for dividing them from the ribbon form (3-3<sup>n</sup>) into individual examples. In accordance with the present invention, a ribbon (3-3<sup>n</sup>) of the intended labels produced in a loom (2) is caused to be fed directly into a cutting device (4). Said ribbon of labels (3-3<sup>n</sup>) in question is caused to be clamped during the cutting operation, and preferably a laser-cutting device (5) is caused to be conveyed across said ribbon (3-3<sup>n</sup>) of labels. The cut labels (1-1<sup>n</sup>; 1A-1<sup>n</sup>A...) are so arranged as to be collected subsequently in a collecting position intended for this purpose. The invention also relates to an arrangement for the implementation of said process.
